

# VoIP Phone

SFT-1200 /SFT-1100

SFT-9200 / SFT-9100

**QIG**

**V 1.01**

---

# 1 Overview

This phone is a full-feature telephone that provides voice communication. Read this QIG carefully to learn how to operate this product and take advantage of its features.

## Package Contents

When unpacking the VoIP phone, ensure all the following items are present and undamaged. If anything appears to be missing or broken, contact your dealer for a replacement.

1. VoIP Phone
2. Handset
3. AC Adaptor (Optional)
4. RJ-45 Cable
5. Quick Installation Guide (This document)

## 2 Product Description

This chapter contains important information to help you familiarize yourself with the functions of the VoIP phone.

### Front View

Name	Description
1 Ring Indicator	A red light to indicate incoming calls or unheard messages
2 Dialing Pad	Press the buttons to dial a phone number or enter alphabetical characters.
3 Speed dial Service Keys	Press any of the keys to speed dial the preset number.
4 LINE 1 / LINE 2	Press to engage or answer a call, or release an active call.
5 HOLD	Press to put an active call on hold.
6 MUTE	Press to mute an active call.
7 MESSAGE	Press to listen to voice messages.
8 Volume control keys	Increases or decrease the volume for the currently active voice receiver for handset. The volume button also controls the ringer volume when on-hook.

# 3 Installation

The following illustration shows how to install the phone on the wall.

## 4 Operation

### Answering a Call

An incoming call is indicated by a ringing tone and a flashing indicator at the top of base units. You can answer the call by doing one of the followings:

- Pick up the **handset** to answer the call.
- Press the **Line (Line1/Line2)** key on the base to answer the call.

### Making a Call

#### Dialing with the Keypad

- Enter the telephone number with the alphanumerical keypad.
- After entering the number you want to call, press the # key to force dialing or wait for 4 seconds before the number is dialed automatically.

#### Using the Speed dial keys

You can use the 6 pre-assigned speed dial hotkeys, to configure the most commonly dialed numbers. Use the function to dial a number quickly, instead of keying in a complete number.

To call a number using speed dialing, follow the steps below:

- Press the speed dial hotkey that has been pre-assigned to the phone number and the call will start automatically.

### Call Options

While a call is in progress, a number of additional options are available.

#### Putting a Call on Hold

You may want to put a call on hold temporarily while doing some work or attending to a second incoming or outgoing call. To put a call on hold, do one of the following:

- Press the **HOLD** key on the phone to put the call on hold.
- When you receive a second call, press the next available **LINE** key to attend to the new call, and the first call will be put on hold automatically.

#### Checking Voice Messages

If the **message waiting indicator** at top of handset or base unit lights up in red, it indicates that there are one or more new messages in voicemail box.

- Press the **MESSAGE** key on the phone to retrieve voice messages.

(An external ITSP or PBX must support voice message feature. And you need to set a voice message code before using the voice mail feature.)

## 5 Support

To configure through the web browser, do the following:

- Ensure the phone is powered up and connected to a DHCP network
- Pick up the handset and then press \*112\*113#, the IP address is announced by the phone..
- Open your browser (such as Internet Explorer, Firefox, etc.) and type in the web address of the phone. For example, if the IP address you obtain in step 4 above is 192.168.1.2, enter the web address: http:// 192.168.1.2:8000.
- When the Web login front page is displayed. Enter the user name and the password and click **Login**. The administrator's user name and password are "admin" and "1234" respectively.
